Green Systems

As the trend for green systems continues to be popular, Sicomin is investing considerable resource and expertise into innovating and supplying new, environmentally enhanced systems that are derived from natural origins.

TOP PRODUCTS

GREENPOXY 56

New generation, clear and waterproof system with over 50% carbon content derived from plant and vegetable matter

Achieves tough and hard wearing gloss laminates.

Suitable for laminating, injection moulding, filament winding, press processes and casting

Guarantee of industrial tonnages available

GREEN CLEAR

Clear laminating and coating systems.

Based on Sicomin Greenpoxy made with more than 50% green carbon content.

The next generation resin

Ideal for large clear casting

Suitable for multipurpose applications

GREEN FIBRES AND CORES ALSO AVAILABLE.

Features and Benefits

- Produced with over 50% of carbon content from plant and vegetable origin (ASTM D6866)
- New generation of bio-based epoxy, the next step towards an oil free system derived from renewable energy
- Achieves tough, hard wearing, strong bonding on multi surfaces
- Easy process
- Low viscosity, fast curing, CMR free
- Developed and manufactured in France
